November/December 2011 Edition

Greetings!

Take advantage of a few of our special offers below and check out the latest Foundation Care news!

Also, as a friendly reminder, please make sure to contact a Foundation Care representative at 877-291-1122 or at help@foundcare.com if your pharmacy insurance plan changes for the upcoming year. This will prevent a possible hold on your prescription shipment due to inactive/incorrect insurance plans.

Thanks again for allowing Foundation Care to be your pharmacy!

FC Attends the 25th Annual NACFC

Representatives from Foundation Care were sent to the North American Cystic Fibrosis Conference (NACFC) in Anaheim, CA to catch up with 4,000 other specialists involved in the CF world - all in three days! While it was a whirlwind of information, stress balls and laminated badges, there were definitely some major topics that stood out to our group.

- The Vertex drug, Kalydeco, was on everyone's minds. This is the first CF drug that focuses on treating the cause, not symptoms, of cystic fibrosis.
- Cognitive Behavioral Therapy (CBT) has been found to significantly help CF patients who also suffer from ADHD.
- Vitamin D3 has been found to benefit CF patients more than Vitamin D2 (but taking supplements should be taken along with enzymes and food to help it absorb).

To learn more in-depth information on these topics (and to find out who won our conference raffles), check out our blog at: <http://blog.foundcare.com>.
